## Live Online-Training

### Leading virtual teams

These times show what possibilities there are to use advanced digitization for our cooperation across boundaries. Digital communication between employees, colleagues and superiors is called for radically.

Change is everywhere and has become an integral part of everyday work and life. This requires rethinking interaction and our own communication. New leadership behavior and new understanding of leadership is needed.

### What we do

In 4 modules of 2 virtual group trainings we'll work in a very interactive plenum. Participants are encouraged to exchange experiences and supporting blended learning material is available (online and offline). On request, this training will support you with an INSIGHTS personality profile.

## Your benefit

You will learn how to inspire and effectively lead a virtual team or only one direct report on remote. You will experience how collaborative methods and communication media are used sustainably in leadership and you will understand what attitude managers need these (digital) days. You'll be enabled to develop a team virtually. Through interactive work in small groups and "best practice sharing" you will develop solutions for your individual challenges in practice in order to give strength to your leadership role.

## Who is this training for

This live online training is aimed at all executives who want to use the changed working methods due to digitization, to give their leadership strength and to develop solutions for leading virtual teams.

## 4 Modules

With a constant focus on virtual leadership, work is carried out in the following subject areas:

- Module 1: understand the new world
- Module 2: reflect and develop yourself
- Module 3: team dynamics and how to manage them actively
- Module 4: professionalize your own communication skills
